### FOOT PRINTS IN THE SAND...

We are proud of our beaches and bays that surround our property, therefore we are dedicated to protecting the environment. Our mission is to serve you the most sustainable ingredients that we can find. First we look locally and if it is not produced locally then we purchase from businesses that utilize sustainable methods to produce their goods or services. We have marked each item that is sustainable with a green leaf **Green Leaf**. Don't Forget to leave your green footprints in the sand!

### Wines

We created a wine list that will entice you to try different whites and reds. Please ask your server for our more expansive bottle wine list if you do not see one here that you would like.

CASUAL DINING ON MOBILE BAY

## FRESH FISH!!!

We proudly serve Alabama Gulf Seafood

Alabama Gulf Seafood is a tradition that stretches back further than that of our own country. The first European settlers in Alabama reported that fish were one of the Native Americans' main sources of food, and by the mid-1700s, Mobile had established itself as a premiere seafood spot thanks to dishes like stuffed Snapper and shrimp jambalaya. Seafood is a big part of who we are, which is why we feel it is important to make sure your seafood comes from Alabama waters.

## Oyster Shell Recycling

Oyster shells that are collected through this program will go

back into Alabama waters to help more oysters grow, provide habitat, limit erosion and improve water quality. Oyster shells collected through this program will go back into Alabama waters to help additional oysters grow. In addition to food value, oysters provide many other ecosystem services, including:

**Improving water quality:** An adult oyster can filter 15 gallons of water per day

**Providing habitat:** Oyster reefs provide habitat for fish, shrimp, crabs, birds and other animals

**Limiting erosion:** Oyster reefs are natural breakwaters that protect shorelines

## Gulf Wild Program

The Gulf Wild trademark ensures that your Grouper, Snapper & other seafood was harvested by US fishermen & came from a well-monitored and continuously improving fishery in the Gulf of Mexico under innovative conservation standards. Using sequentially numbered gill tags with traceable QR codes, there is full disclosure and accountability. From details such as who caught it, where was it caught, from what vessel & more, there are no lingering questions or concerns about authenticity, integrity or value.

\*Consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of food borne illness, especially if you have certain medical conditions.

\*\*There is a risk associated with consuming raw oysters: If you have chronic illness of the liver, stomach or blood, or have immune disorders you are at greater risk of serious illness from raw oysters, and should eat oysters fully cooked. Please notify your server if you have any food allergies or require special food preparation and we will be happy to accommodate your needs.
